## SOAP BOX: contest user comments

### **DK5EW contest manager:**

This 2010 MS SPRINT contest was a really good activity by many active stations. As well several rare squares have been on air. The Perseids 2010 it selfe was with it's ZHR again below the last years with his preticted by IMO and MMonVHF. The winner of the QRP section (LZ1KQ) and the winner of the QRO section (LY2WR) shows that you have to do as many of QSO's are possible to win that contest. DH6DAO was very clever to handle in his only SSB QSO in the Vintage section. W7OJT was the only "outside Europe"station - TNX for participation. Congratulations to all winners and participants of the MMonVHF.de + DUBUS MS Sprint meteorscatter contest !

### **DG7YBN:**

hat Spass gemacht ... ein toller Wettbewerb

### **YT1VP:**

another fantastic contest with many participants and good reflections. Hear it in the coming years.

### **5B/LZ1UK:**

I was in Cyprus for the WAEDC CW HF Contest as a member of the C4I Contest Team.I decided to give some points to my bulgarian friends from my club station.

### **DM2ECM:**

anbei meine kurze Abrechnung; eigentlich sollten es mehr QSO's von der Insel Rügen werden.Aber unwetterartige Gewitter mit Starkregen machten mir einen Strich durch die Rechnung.

### **W7OJT:**

I'm certain that I didn't get on until after the peak. Best results at the beginning then got harder to make the long ones. Don't have any hope of winning but wanted to turn something in just to say "thanks" for supporting meteor scatter by sponsoring this contest.

### **DJ9YE:**

another MS Sprint. Has been nice to be QRV again. Sometimes vy gd condx. See u next Year !

### **DH6DAO:**

es war zwar nur ein QSO, ich sende es trotzdem mal für den Kontest ein, zumal es mein erstes MS-QSO auf 2m jemals war.

### **DJ3LE:**

anbei mein Log vom Mssprint 2010. Es hat mir sehr viel Spaß gemacht nach langer „Abstinenz“ vom 2m Band wieder mal richtig mitgemacht zu haben.Eine tolle Idee ist das mit dem Mssprint und ich hoffe,dass er kommendes Jahr wieder stattfindet.Noch kurz zu den Perseiden 2010. Ein richtiges echtes „Maximum“ konnte ich eigentlich nicht feststellen. Das kann aber auch am übermüdeten Operator liegen ;-)

**DL1HW:**

Als Newcommer zu Meteorscatter habe ich ein ganz kleines Log mit nur einem QSO. Interessante Betriebsart.

**HB9FAP:**

Dear MMonVHF Team, since the contest has been issued in 2008, there has been a big growth in participants every year. Also this year I noticed a higher number of QSOs and sometimes it was a kind of "pile-up via MS", this was really a lot of fun (could get simultaneously up to 7 stations calling me). Pity that not always everybody is patient to wait his turn. I noticed a very high number of stations active from Ukraine (congrats!) and also with the United Kingdom I had a clearly higher QSO number than in the previous years. Reflections were in my opinion not bad and all in all a good perseids shower. I think that best reflections were more or less between 21 and 24 utc on 12th of august. I would like to thank very much all stations who called me and made QSO with me, I am sorry about the stations with NC QSO. A few QSOs over >2000 KM were done. The funniest QSO was probably with Peter SM2CEW (2185 km): I got a long burst with RRRR from him (S9!) and I could have time to switch to slow CW sending him my RRRR+73s. Peter thought it was a local station sending on his QRG ... I could hear up to 2300 km distance via MS and best complete distance was with Kari OH7HXH, 2207 km.

Dear MMonVHF Team, I am convinced that the MS Sprint on perseids peak is a very nice idea and the growing number of participants is a clear sign that you organized something that MS HAMs like. It was a very good idea to "switch" the start of the contest at 12utc in order to be almost 100% sure to catch the peak(s) of the shower during the contest time. CU next year, best 73s de Fabio, HB9FAP

**IT9VDQ:**

thanks for sponsoring such a contest! Many thanks from Joe IT9BLB and me.

**LA0BY:**

Ich war eigentlich nicht speziell auf den Contest fokussiert, sondern mehr auf "Klasse statt Masse" geachtet. Mit 9 neuen SQR und 1 DXCC war ich sehr zufrieden.

**YL2AO:**

Tnx for the Contest!

**YO5PLD:**

Thank you for the nice contest.. I was QRP because of the PA blown by intensive EME "course" so only 60w from the Icom 820H. The Perseids wasn't so nice, I don't observe the peak, only a small outburst at about 11:30 - 12:00 UT

**YT1VP:**

another fantastic contest with many participants and good reflections.

**ON6NL:**

I was rebuilding my shack (actually my wife organized that) so I lost track of my radio activities. I don't remember if I already send my MMsprint log! So sorry if it is double. After winning the 2009 Sprint, I was a little less motivated this year and was hunting the DX too much. Best QSO was the last one. I made first a QSO with EB4DEH with a lot of help via the KSTchat as this was his first QSO. After that we did a nice QSO under his new call EA4SG according the rules. Great to have a new Meteor hunter now.

**UT2UB:**

Thanks for nice contest!
