BILTEN JE NAMENJEN INTERNOJ UPOTREBI U ORGANIZACIJAMA
SAVEZA RADIO-AMATERA JUGOSLAVIJE.

Kao što smo najavili, ovaj Bilten donosi sredjene podatke o Es otvaranjima u YU na bazi prispelih podataka koje su nam dostavile stanice koje su se odazvale našem pozivu.

Iako je jasno da se izvestan broj stanica za koje se zna da su radile u ovim otvaranjima nije javio sa svojim izveštajima, podaci koje imamo dovoljni su da se dobije uvidu kvalitet ovih otvaranja u pogledu mogućnosti za rad koje su pritom postojale.

Početak godine mogle su se po stranim časopisima pročitati članci koji obradjuju radio-prostiranje i prognoze koje su pritom davane u vezi sa maksimumom aktivnosti sunca koji predstoji početkom iduće godine. Kao jedna od pratećih pojava aktivnosti sunca ES je bio posebno obradjen. Po predviđanjima većine autora, ovih otvaranja u toku sezone za ES trebalo je da bude više nego prošle godine. Nakon pregleda prispele pošte, prema izveštajima YU stanica broj registrovanih otvaranja je na nivou prošlogodišnjeg: 14 otvaranja.

Izvesno je da iako pojava ES zavisi od toga kakva je aktivnost sunca postoje još neki elementi koji direktno utiču na uslove koji su potrebni da dodje do takvog inteziteta jonizacije na E sloju da bi on mogao da se upotrebi za komunikacije na 2 m. Nadamo se da će se uskoro više znati o prirodni ovog fenomena da bi smo mogli da se bavimo preciznijim prognozama vezanim za ovu vrstu prostiranja. Ovako, kao do sada ostaje nam da uključimo naše monitore: TV prijemnike i FM VHF difuzne prijemnike i da pratimo kretanje MUF-a tokom dana da nam neko od ovih otvaranja na 2m nebi promaklo.

73 Moma, YU1NPW
